

Our company has a high focus on Health-Environment-Safety and Quality. Our core values are that all employees should experience a safe and supportive working environment.

We will on a regular basis evaluate the Quality Management System and use resources to improve work processes to meet this Policy.

Our products and services shall be delivered according to relevant existing legislation, relevant standards and customer requirements.

An important element in order to achieve our goals is the extensive use of our quality system and, through our daily actions, demonstrate our commitment to these values.

The management team is committed to create a safe workplace for our employees and those we work with, in order to avoid accidents and occupational illness.

In practice, this means that we constantly develop and improve our processes in order to achieve:

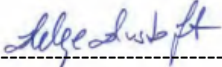

- Zero recordable injuries
- Zero work-related diseases
- Zero material damage
- Customer satisfaction
- Enhanced products and services

Our Quality and HSE documentation include:

- The Employee Handbook
- Quality Manual
- HSE System Description

It is our goal that all projects carried out by Dwellop shall be known for high levels of HSE and Quality. Through setting high standards for ourselves in line with these values we aim to achieve the highest employee and customer satisfaction.
